EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows: In line 14 on page 1 of the specification, after "May 4, 2001" insert —currently pending—

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: Applicants have claimed a process for treating a lipophilic fluid contained in an emulsion comprising specific process steps, none of which include distillation. It is well known in the art to purify dry cleaning solvents for re-use, however, far and away the most common purifying method is distillation, that is, heating and condensing the solvent to separate the solvent from water and other contaminants. In light of this, it would not have been obvious to one of ordinary skill in the art to ignore the most common and effective art-recognized means for purifying a solvent to arrive at the presently claimed invention. Accordingly, the present claims are allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
